Batch for Release #2

- Submissions use SOAP with Attachments message format

- XML Signature used for signing

- Authenticate with IdenTrust ACES client certificates

- The schemas will be the same

- Current functionality will stay the same and will include

  o Status download

Key Differences

- Support multiple submissions per batch

- The URL will be different

- Implemented using SAAJ APIs included with Java 8 JDK; No third party libraries

- Submissions will require proper multipart/related content type

Batch for Release #3

- Registration, Material changes, Disclosures, Advisory Opinions, and Licensing form will be included in the batch process

- Revamp of the Batch process to a RESTful web service

- Before Release #3, provide documentation for updated changes to web service

- After Release #3, legacy SOAP batch processing will continue to be available during a six month transition period

  - Allows users to migrate over to new REST web service

  - Does not disrupt current procedures to processing
